LUNA-II™ Automated Cell Counter

Small yet powerful, the LUNA-II™ is cell counting convenience at its finest. Simply insert your sample and the LUNA-II™ does the rest: autofocus, adjust light, and count in just 15 seconds.

Art.No. L40002

- Fully automatic cell counting and cell viability analysis
- Autofocusing based on liquid lens technology
- Dye-exclusion (i.e Trypan blue or Erythrosin B)
- Most affordable running costs currently on the market
- Reusable or disposable slides available!

Special offer! 21 900kr

Precellys Evolution - Homogenizer

The most advanced tissue homogenizer combining high efficiency and versatility for all sample preparation needs.

MONITOR THE INVISIBLE

Art.No. P000062-PEVO0-A.0

Capacity:

- From 8 to 96 wells, 300µl
- From 1 to 24 tubes, 2ml/0.5ml
- From 1 to 12 tubes, 7ml
- From 1 to 6 tubes, 15ml

Speed range:

- From 4,500 rpm to 10,000 rpm (increment by 100 rpm)

Number of cycles:

- up to 10

Cycles time:

- up to 90sec (increment by 1sec)

Special offer! 112 000kr

TipOne® Pipette Tips

TipOne® is the original refillable, reusable and recyclable pipette tip system!

Recent improvements to the design of the system, based on customer-feedback, is why **TipOne®** is one of the leading tips for research labs.

Tip fit

One tip fits all! The tip collar is engineered to fit all popular pipettes.

Green tip design

A reduction of up to 40 % in the material used for the production of **TipOne®** tips helps to save valuable resources and is beneficial for the environment.

Try the unique filter tip refills!

V-1 plus - Personal Vortex

Ideal instrument for gentle mixing to vigorous resuspension.

Art.No. BS-010203-AAG

- Two modes: continuous and impulse operation
- Speed control range 500-3000 RPM
- Acceleration time <1 s
- Mixing module for tubes from 0,2 to 50ml

Special offer! 2 100kr

DNA-Exitus Plus™

Get rid of DNA and RNA contamination in your life science lab enabling trueness and reliability for your (COVID-19/PCR) analysis!

DNA-ExitusPlus™ IF - DNA & RNA decontamination, indicator free version.

DNA-ExitusPlus™ - DNA & RNA decontamination, with surface trace indicator.

- Non-toxic nor even harmful
- All components are biologically degradable

UV Pipette Cleaner Carousel

nUVaClean™ is the first and only pipette rack that not only organizes and protects six pipettes, but also destroys greater than 99% of unwanted contamination.

Art.No. BMS-P5590-E

- Destroys >99% Virus, DNA/RNA, Bacteria, Mycoplasma
- UV-C lamp and reflector system
- Eliminates cross-contamination
 - 360° UV exposure
- Fits virtually any pipette

Benchmark Scientific

Special offer! 3 995kr

PCRmax Eco 48 Real-Time qPCR System

World's most thermally accurate block gives consistent data every time!

Art.No. ECORT48

**Interested?
Call us for more
information or
an offer!**

- HRM functionality as standard with the ability to discriminate class IV SNP >99% of the time
- Eco 48 allows for simple multiplex analysis with up to four dyes at once
- High uniformity provides high quality data. Fast cycling enables several experiments per day, all at an economical price
- Fastest block-based real-time PCR system: 40 cycles in 40 minutes as standard and 40 cycles in as little as 15 minutes after optimisation of temperatures and hold times

Cole-Parmer®
scientific experts

UV CLAVE™ UltraViolet chamber

Short-wave UV light is an effective method for the disinfection of surface DNA, RNA and microorganisms. With the UVClave chamber, highly focused UV irradiation is used to disinfect tools, vessels and other research items, eliminating up to 99% of surface contamination.

- Improves quality of PCR research by reducing potential contaminants
- Multiple lamps and reflective chamber walls provide true 360° irradiation
- Proprietary UVC transparent shelf, eliminates potential for missed coverage (blind spots)
- Inactivates DNA, RNA, viruses & bacteria on PCR vessels
- Adjustable cycle time

Benchmark Scientific

Art.No. BMS-B1450-E

Special offer! 5 900kr

FluidX, Tri-Coded Tubes with External Thread and Next-Generation Jacket

FluidX Next-Generation jacket tri-coded tubes offer unequaled sample audit traceability, enabling sample tracking and data sharing between multiple users, labs, locations and automation capabilities

fluidX™

From Brooks LIFE SCIENCES

- Next Generation manufacturing techniques
- Codes readable without removing tubes from racks
- Suitable for cryogenic storage
- Made from high-quality virgin PP; production sterile
- Available in 96-well format SBS racks or bulk
- Sealable with screw caps/TPE septum caps

Permanently laser etched 2D code on base, 1D linear barcode and human readable number on the side, ensuring a permanent link between sample and data

Contact us if you want a FluidX tubes sample pack!

BioQuant-96 - real-time PCR detection system

BioQuant-96 is the newest product of Biosan Molecular diagnostic product family!

Art.No. BS-050110-AAB

Sample capacity: 0.2ml single tube (transparent cap), 96x0.2(0.1)ml Plate (transparent cap), 8-strip tubes (transparent cap)

Heating/cooling rate: 6.0 °C/s / 5.5 °C/s

Temperature accuracy: $\leq \pm 0.1^\circ\text{C}$

It will fully meet the demand of scientific research and clinical diagnosis.

It has adopted mature thermoelectric refrigeration technology, brand-new light source and light path design.

The unique constant current power and 6-zone independent temperature control method ensure more rapid, correct and stable fluorescence quantitative analysis of the product, while maintaining its excellent performance in low energy consumption.

Special offer! 295 000kr

Benchtop and portable pH-meter

Benchtop pH-meter kit included pH electrode 201T, pH buffer solution, electrode holder

Meas. Range/Resolution(pH) 0,00...14,00

Measuring Accuracy (pH) 0,1/0,01

Calibration points 1...3

Measuring range (mV) ± 1.000

Resolution/Accuracy 0,1 / $\pm 0,5^\circ\text{C}$

KingFisher™ Style

Microplates for nucleic acid sample prep

The global increase in sample testing for infectious diseases (predominantly COVID-19) has led to a significant shortage of plastic consumables for high throughput sample prep systems.

But if you work with **KingFisher™** instruments, we've got you covered! We have recently launched 3 plastic consumables designed for high throughput nucleic acid sample prep, ideal for use with **KingFisher™** systems.

All our **KingFisher™** style consumables are free from RNase, DNase, human genomic DNA and pyrogen. We now accept quote and sample requests. Read below to get the details!

96 Square Deep Well Microplate, KingFisher™ Style

- Art.No: **4ti-0150 (pack of 50pc)**
- 2.0ml square wells, V-shaped bottom, clear polypropylene
- Compatible with KingFisher™ Duo Prime, Flex, Apex, Presto

Price 3 717kr

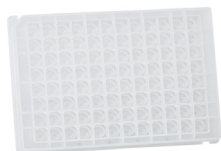

96 Tip Comb for Deep Well Magnets, KingFisher™ Style

- Art.No: **4ti-0152 (pack of 100pc)**
- 96 format tip comb, clear polypropylene
- Compatible with KingFisher™ Flex, Apex, Presto

Price 8 213kr

96 Square Well Microplate, KingFisher™ Style

- Art.No: **4ti-0151 (pack of 50pc)**
- 200µl square wells, V-shaped bottom, clear polypropylene
- Compatible with KingFisher™ Flex, Apex, Presto

Price 2 667kr

Bio•Wand™ Personal UV Sanitizer

Bio•Wand™ uses UV light (265 to 280nm) to disinfect any object/surface in the lab!

- Portable UV Disinfection
- Kills up to 99% of bacteria and viruses
- Destroys DNA & RNA
- Handheld, cordless, rechargeable

Art.No. BMS-U1001-W

VITsafe™ safety wash bottles, narrow-mouth

Bottles made from PE-LD (or PP for Acetone), spray tube from PP. With coloured VENT-CAP which supports easy visual identification of the media.

More safety due to the durable safety imprint in accordance to Directive (EC) No. 1272/2008 (GHS), as well as with all important information:

- Material name in German, English, French and Spanish
- Chemical formula, CAS No., hazard pictogram, signal word
- Risk phrases (H phrases), safety phrases (P phrases), as well as NFPA Code

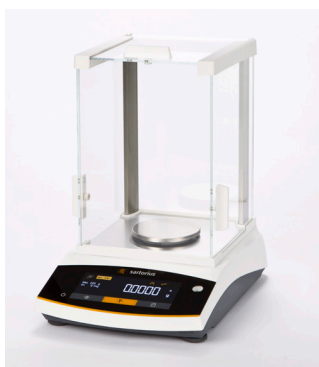

With precise spray jet and optimised medium backflow.

SARTORIUS

Picus® electronic pipettes 1-ch.

Its highly sophisticated and completely ergonomic design will reduce your risk of repetitive strain injury (RSI). Fully electronic operation ensures the maximum accuracy and repeatability of your results.

- Uniquely lightweight and compact design
- Conveniently located, one-touch operating-button and feather-light electronic tip ejection
- Electronic piston control and brake ensure accurate, user-independent pipetting results.
- Unique plate tracker increases reliability in microwell plate dispensing.

ADAMII™ - Fluorescence CD34 Counter

Revolutionary new way to count CD34!

FDA
510(k) cleared

ADAMII is an image-based fluorescence cell counter, which captures and analyzes multiple images.

It has 4-channel (Bright, Yellow (PE), Red (PerCP) and Green (FITC)) light sources.

- 15 minutes for counting CD34
- Easy to use
- Accurate and reliable result
- State-of-the-arts optics and image analysis software

**Interested? Call us for more
information or an offer!**

The Coriolis Compact - a dry Cyclonic air sampler

The Coriolis Compact is a dry Cyclonic air sampler able to operate up to 8 hours straight and compatible with multiple downstream analysis (NGS, qPCR, Culture)

New!

Art.No. P002055-CORC0-A.0

Virus collection & detection

One of the main challenges of virus monitoring in the air is obtaining adequately concentrated samples. With its dry sampling technology, the Coriolis Compact is a perfect instrument to detect viruses in the air.

Indeed, after each collection, users can choose the volume of solution in which they wish to resuspend their sample.

Additionally, solutions that can preserve the nucleic acids present in the sample can also be taken advantage of. For example, in the case of RNA viruses such as SARS-CoV-2, users have the option to immediately resuspend their sample in Trizol to protect RNA against degradation.

Special offer! 110 000kr

LUNA-FX7™ Automated Cell Counter

Excellence of counting both Brightfield and Fluorescence!

Best in class accuracy

Improved counting algorithm and increased measuring volumes lower the CV, even less than 1%!

Multiple samples in one go

New 8- and 3-chamber slide increase the sample throughput.

Expanded cell concentration range (1.0E04 – 5.0E07 Cells/ml)

Suitable for diverse cell counting applications including single cell sequencing and CAR-T dosing determinations.

Data may be exported via Wi-Fi, Ethernet, or USB flash drive!

Call us for an offer!

Cube Rack Reader with new DP5 Standard Software

The Cube can read all racks on the market including Cryoboxes and SBS racks; even 384 racks!

DP5 is the latest version of **Ziath's** market leading 2D rack decoding software.

Using the latest technologies **DP5 can be run from a laptop, desktop, phone, tablet or any other network connected device.**

The same robustness, reliability and speed are there but now you can work unchained from your lab bench.

Ziath

- Smallest 'scan all' scanner on the market
- Camera based instrument resulting in rapid imaging and decoding
- Footprint ideal for benchtop and integration

DP5-C-STD, Cube standalone with software DP5 Standard, **69 500kr**

DP5-C-STD-80, Cube standalone with Cryoprotection and DP5 Standard software, **75 500kr**
