If you have questions don't hesitate to contact our customer service who will put you in touch with one of our product specialists.

## Semi-Automated Handheld Screw Cap Decapper Portable and lightweight

NEW!

IntelliXcap™ M8 - Designed with the user in mind!

**AZENTA**  
LIFE SCIENCES

**Special price!**

29 000 SEK/NOK  
20 000 DKK  
2 800 €

- Lightweight, handheld, semi-automatic single column-based capper/de-capper
- Compatible with 96-SBS rack format screw capped tubes
- Caps a single column in under 4 seconds; caps/de-caps a complete rack of 96 tubes in less than 90 seconds
- All caps are tightened to the same torque to create a secure seal
- Battery operation allows capping/de-capping for more than 40 complete racks
- Includes docking station for instrument charging and placement/storage for contamination-free handling of caps

Art.No. BRO-46-9012

FluidX has been rebranded and is now part of the  
**Azenta Life Sciences portfolio**

Individually packed - Non pyrogenic - Non cytotoxic - DNase/RNase free - Human DNA free

# Homogenize any kind of biological sample, from the softest to the hardest with Precellys® 24 Touch!

It can treat up to 24 samples at a time and has been validated on more than 1500 different samples: from brain, muscle and heart samples, to very hard material such as bones, hair and seeds.

Art.No. P002391-P24T0-A.0

## Capacity

- 1 to 24 tubes of 2ml
- 1 to 24 tubes of 0.5ml

## Speed range

- 4.500 rpm to 6.800 rpm
- (by increments of 100 rpm)

## Cycles time

- Up to 90 sec

## Special price!

99 000 SEK/NOK  
70 000 DKK  
9 500 €

## Trade in offer!

Trade in your Precellys 24 or equivalent instrument from another manufacturer against a Precellys 24 Touch and get **10% extra discount!**

## SmartReader UV-Vis Microplate Absorbance Reader

**SmartReader™ UV-Vis Microplate Reader** has been designed with ease-of-use and fast results in mind.

SmartDrop™ Accessory Plate This instrument brings extensive capabilities to the lab bench and is designed for the busy lab with multiple users.

The large touch screen command center is extremely user-friendly and allows for fast set up of new protocols, as well as modifying and running existing protocols.

**Plate shaking: Linear with three levels of shaking speed**  
**Incubator: From ambient + 5° to 45°**

Absorbance measurements of exceptionally small volumes (<0.5ul) can be achieved using the **SmartDrop™ Accessory Plate**.

Bertin **Bioreagent** offers a large range of assay kits from **ELISA** to enzymatic activity kits, validated for their precision, accuracy and specificity.

**CORNING**

## UNO & DUO - Single tube readers

Simply hold your tube to the scanner window and the code is instantly displayed!

UNO

DUO

- Easy set-up, straight out of the box
- Reads all 2D Datamatrix coded tubes, including Brooks/Azenta Acoustic tubes (with Acoustic add-on)
- **UNO** features higher resolution camera that can often decode older, badly-printed barcodes
- **DUO** combines the Datamatrix reader with a linear barcode scanner to read rack codes or 1D barcodes along the edge of some tubes.
- Super-fast electronics capable of reading 2D barcodes from any currently available tube on the market, including 384-well tubes
- Large scan windows make it easy to present the tubes

# SmartDrop X a full spectrum UV-Vis spectrophotometer, requires only 0.5 to 2.0µl of sample

To provide the most accurate results, the SmartDrop X utilizes 2 path lengths!

Art.No. BMS-NS1010-E

- Full-spectrum absorbance scans from 200 to 800nm
- Quickly calculates and displays 260/280 and 260/230 ratios
- Long-life Xenon lamp with precision monochromator
- Auto-ranging path lengths of 0.2mm and 1.0mm
- Detect up to 4,500 ng/µl of dsDNA without dilution

**Special price!**

# Minisart® RC Syringe Filters for HPLC Sample Preparation

SARTORIUS

## Clean & Green

**Minisart® RC** is just as suitable, and often even better, for HPLC sample preparation than PVDF. The broader chemical compatibility of **Minisart® RC** enables usage with DMSO and for an even wider range of applications.

RC is produced using renewable raw materials in an **ecofriendly process**, which uses biodegradable components and recycles all solvents employed during manufacture.

Our RC polymer is naturally hydrophilic so no additional coating step is necessary.

**Try our Clean and Green solution to prepare your samples!**
