TipOne® is coming home!

We have exciting news in answer to our customers' most asked question:

Q: What are you doing with the plastic from my TipOne® recycling?

A: We are closing the loop!

Starting on 2nd January, we began the process of moving TipOne® manufacturing from the USA back to Germany. The move to Germany will bring numerous economic and sustainability benefits.

The manufacturing move also signals the next milestone on the sustainable journey for TipOne®. It means we will now start to **use the plastic returned via the TipOne® recycling service to make the base of our TipOne® racks!** We are proud that we can say that we have started to close the loop. We could not have achieved this milestone without you, our customers, and your continued support and use of the TipOne® recycling collection service.
