

Biocomposite PCR Plates

We are proud and pleased to introduce the world's first PCR plate designed to help reduce plastic waste by using earth-friendly biocomposite materials.

- Superior performance from our 2-component B-Frame® PCR plates
- Thin-walled tubes made from 100% virgin medical grade PP and frames made of earth-friendly biocomposite materials
- With our sustainably-sourced biocomposite material, we are able to reduce the amount of plastic used by 46%
- Manufactured to the highest quality standards for your PCR and qPCR applications

The Perfect pipetting partnership - Universal Tips for all needs!

Recycled cardboard boxes

TipOne® the trusted tip

The clever refill

The perfect rack

The colour-coded wafer with all information

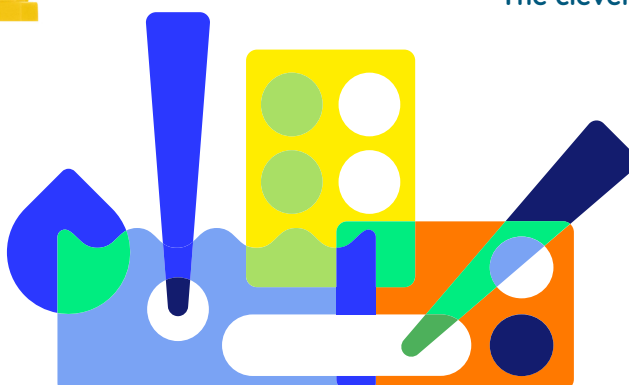

The plastic-saving sterile refill

The self-standing resealable bag

The compact stack rack

pluriSelect® offers a large variety of cell strainers serving nearly every need!

Available in 19 mesh sizes from 1 - 1000 µm

The popular choice for robust and easy sample pre-filtration.

The best choice for an affordable cell strainer system with flow control (in combination with Connector Ring).

The pluriStrainer is a sterile sieving device to obtain real single cell suspensions or to remove cell aggregates. It fits into any 50 ml centrifuge (conical) tube and comes with many features.

Sartorius Introduces Faster, Higher Capacity Sartolab® RF | BT Vacuum Filtration Units

Sartolab® RF | BT vacuum filtration units - Best engineered to meet today highest requirements

SARTORIUS

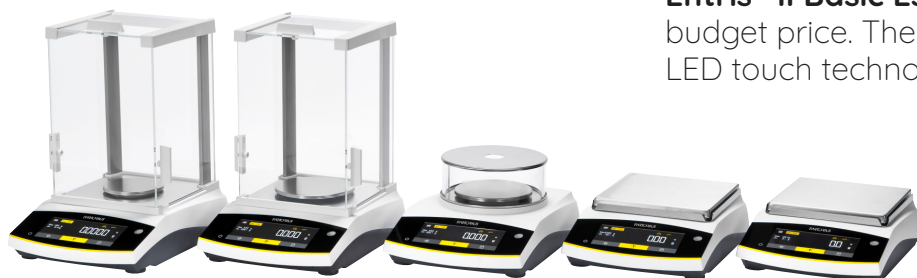

- Redesigned units provide faster, higher capacity and greater physical stability for a wide range of sample types
- Larger membrane surface area facilitates optimal filtration
- Use of polyethersulfone membrane in the 0.45 µm pore size filter increases the flow rate with the same low protein binding properties

Monobuf®, pH Standards, measured according to ISO/IEC 17025

Have you ever had to dispose of an open pH standard bottle because you were unsure of its accuracy?

If your answer is yes, **Monobuf®** is your solution.

Our **Monobuf®** bottle allows you to open a new flask of pH standard each time you have to make a calibration.

Ideal for field analysis.

Freeze-dried/lyophilised PCR mixes - No freezer required!

Freeze-dried/lyophilised PCR mixes are stable at ambient temperatures and allow point-of-care use without any refrigerating infrastructure.

Simply fill up vials with your template material and run PCR as usual!

Benefits:

- Ready-to-use: No thawing of PCR components
- Storage: Stable at room temperature / **no freezer required**
- Activity: No loss caused by freeze-thaw cycles
- Avoid contamination: receive dry mix in aliquots
- Customized: Available in all common PCR plastic ware and include primers/probes

Individual Access 96 Well Skirted PCR Plate

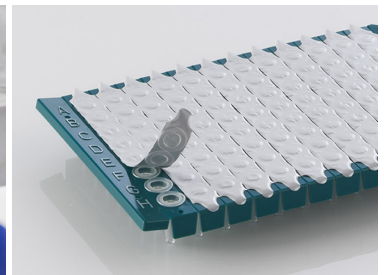

96 well, fully skirted, low profile format with each tube inserted separately into the plate frame, allowing for selection and removal of individual tubes from the plate.

Each tube clicks into place in the frame ensuring tubes are secure once inserted.

The rigid polycarbonate skirt of this design eliminates warping and distortion during PCR.

Individual or 12 strip of 8 individual Access Peel Heat Seal

Heat sealing offers a 100% effective method of plate sealing, for complete seal integrity, as well as being quick and cost effective.

Our Individual Access Peel Heat Seal is a laminate seal compatible with polypropylene plates, featuring 96 individual foil seal spots or 12 strips of individual spots on a removable backing.

New!

MONITOR THE INVISIBLE

Precellys 24 Touch can treat up to 24 samples at a time and has been validated on more than 1,500 different samples: from brain, muscle and heart samples, to very hard material such as bones, hair and seeds.

Its intuitive touchscreen interface makes it really easy to use.

Precellys 24 Touch is compliant with safety requirements of the harshest lab environments, such as BSL3.

Allows homogenization of up to 24 samples in a few seconds (~30 sec) at speeds ranging from 4000 to 6800 rpm.

Samples can then be processed for further analysis amongst a wide variety of techniques dedicated to DNA/RNA (PCR, electrophoresis, NGS, chips, etc.), protein (blotting, mass spectrometry, etc.), or metabolites analyses (chromatography, etc.).

Prices are valid until 31st of August and cannot be combined with other agreement or discounts.

Quote discount code VK22 when ordering. General terms and conditions of sale apply, see our website. We reserve the right to make printing errors.
