

# SPRING CAMPAIGN

APRIL - JULY 2026

## BIOPROCESS

OUR FASTEST GROWING BUSINESS, BIOPROCESS PRODUCTS FROM SANISURE.

### The Best Home a Drug Can Get!

SANISURE are the global leader in Single-Use Technologies (SUT) for complex flow paths and closed system designs.

Explore our proprietary solutions, custom assemblies, and engineered components to help solve your most demanding Bioprocessing and Advanced Therapies workflows.

### Range of Solutions

- ✓ Small to Medium Volume Mixing
- ✓ Drug Product Filling
- ✓ Bulk Filling & Sampling
- ✓ Automated Adherent Cell Culture
- ✓ Fit-For-Purpose Flow Paths

# HANDHELD DECAPPERS

**NEW!**

**M6**  
36.000 SEK  
37.800 NOK  
23.900 DKK  
3.159 €

Art.No. BRO-46-9011

IntelliXcap™ M6 and M8 Semi-Automated Handheld Screw Cap Decappers, 6- & 8-Channel

Cap driver cartridges for different labware types is available

**AZENTA**  
LIFE SCIENCES

M8

Art.No. BRO-46-9012

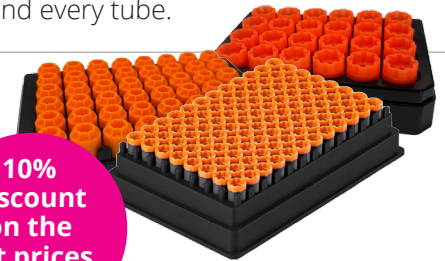

Portable and lightweight, the Semi-Automated Handheld Screw Cap Decapper is designed for use in any laboratory. Capable of capping a single column of 6 or 8 screw caps in under 4 seconds, the instrument offers consistent sealing for each and every tube.

## CAP CARRIERS

SBS-format screw cap carriers deliver efficient, automated capping of 24-, 48-, and 96-format sample storage tubes. Designed for both automated and manual applications.

**NEW!**

**10% discount on the list prices below**

BRO-66-9954	Cap Carrier 24-format, External Thread, 10 carriers/240 caps	4200/4410	2814	368

## SINGLE TUBE DECAPPER/RECAPPER

**CALL FOR AN OFFER!**

Art.No. BRO-46-0001

**The IntelliXcap S1** Semi-Automated Screw Cap Single Tube Decapper/Recapper simplifies tube handling – without requiring a gripper change, the IntelliXcap S1 is fully compatible with different volumes of internally and externally threaded tubes, offering an uncomplicated solution for demanding daily tasks.

Ideal for larger master sample screw cap tubes with 11-40mm diameter range

- ✓ Reduces risk of repetitive strain injuries
- ✓ Broad compatibility
- ✓ Easy to use, one-handed operation

The Biosan **UVC/T-M-AR** is a benchtop DNA/RNA UV-cleaner workstation designed to create a clean, contamination-free environment for PCR setup and other nucleic acid-related workflows.

Art.No. BS-040104-A30

- ✓ Glass walls
- ✓ Digital display
- ✓ Stainless steel working surface
- ✓ UV radiation level: 18 mW / cm<sup>2</sup> / sec
- ✓ UV-recirculator 1x25W (efficiency >99% per 1 hour)
- ✓ Automatic open UV-lamp switch off when screen is open

# LABORATORY BALANCES

CLARITY WITH EVERY MEASUREMENT!

**BRAND NEW RANGE, POLARIS!**

With **Polaris**, clarity is the highest priority. A range of semi-micro, analytical, precision and toploading balances for the professional laboratory, Polaris focuses on clear, unmistakable weighing results. Lots of different models available, below a few example! Let us help you find the right model for your needs!

# ACTIVE LECTINS™

Welcome MAL!

Expanding our portfolio to support your science, we're excited to present Maackia amurensis lectin (MAL) from Medicago Group.

Maackia amurensis lectin or leucoagglutinin (MAL): Isolated from Maackia amurensis (amur tree) seeds and purified by affinity- and ion exchange chromatography.

MAL binds strongly to specific sialylated glycans, particularly 3'Sialyllactose. This property makes it a valuable tool for research in areas such as cancer screening and influenza virology.

MAL is now available for your next project!

# SMARTBUFFERS™

SmartBuffers™ – The Intelligent Solution for Efficient Buffer Preparation

Medicago has developed SmartBuffers™ to simplify and streamline the work with biological buffers. By offering buffers in convenient tablets and precisely portioned powder sachets, they eliminate the time-consuming preparation work – each unit is already accurately measured and prepared for easy dissolution in a specified volume of deionized water.

# CORNING® MSCulture Max™ Media

**Corning MSCulture Max Media** increase final hMSC yields, streamline culture, reduce in-process risk, and eliminate media exchanges, enabling higher cell expansion with less media and fewer media changes.

The MSCulture Max media is available in 3 versions. Each media version is made up of a basal medium and a corresponding supplement.

## FEATURES

- ✓ High-performance expansion media for batch culture systems
- ✓ No media exchanges required
- ✓ No surface coating required

**INTERESTED? CALL US FOR MORE INFORMATION!**

## BENEFITS

- ✓ **Unparalleled productivity:** Achieves over 10-fold hMSC expansion within 4-5 days without media changes, significantly reducing time and labor cost.
- ✓ **Transition-friendly formulation:** Research, xeno-free, and cGMP versions available for rapid translation pathway from research into clinical manufacturing.
- ✓ **Scalable and efficient bioprocessing:** Enables high-volume cell production with minimal media consumption.

# STRIPETTOR® PRO PIPET CONTROLLER

Art.No. 4999

This light, ergonomic, motorized pipet controller is designed for use with glass and plastic serological pipets from 0.5 to 100ml.

When fully charged, the batteries enable up to 6 hours of continuous use.

# qPCR MULTIPLEX MASTER

Simultaneous Detection Made Easy – Experience our new qPCR MultiplexMaster!

We significantly improved our qPCR MultiplexMaster Kit making it more robust against common PCR inhibitors while keeping its high sensitivity and reproducibility. Now you can easily analyze 4 targets and more without losing signal strength.

The qPCR MultiplexMaster Kit is a master mix designed for the quantitative real-time analysis of pre-purified DNA coming from various sources such as blood, swabs, animal or plant tissue.

The system overcomes multiplex limitations of conventional qPCR probe mixes combining an above-average robustness with an excellent sensitivity for amplification of lowest template amounts.

## CUVETTES

For photometric measurements even in the UV range 220 nm

Due to the special plastic material and the excellent manufacturing process, the cuvettes can also be used in photometric ranges reserved for UV glass cuvettes in the past.

- ✓ Applicable wavelength range 220 to 900 nm
- ✓ Very low variation of extinction values
- ✓ Excellent optical transmission range
- ✓ Cavity-sorted production
- ✓ Path length 10 mm
- ✓ Outer dimensions 12.5 x 12.5 x 45 mm
- ✓ Supplied in practical styrofoam racks
